How do you make sure the hosts are enjoying the performance? Prior to the performance I have developed a good relationship with the host and know exactly what they are looking for and I stick to the plan. Additionally I check with them throughout the party to ensure they are happy. White glove all the way.

What type of personality do you have? Since I've been entertaining nearly my whole life, I typically can mold myself into whatever it is they are looking for but I would say moderate to outgoing, but with class.

Why do you enjoy working at Complete Music? I love the extensive and on-going training I receive from Complete Music. They make sure we are the best trained DJs in the area. I also like the fact that they care about their DJs as well as the customer. They will do what it takes to make sure DJs have what they need to put on a great show. They want us to be happy and succeed, which is the bottom line.

Why do you enjoy performing at weddings? I take a great deal of pride in providing a positive contribution to one of the most important times in a bride and grooms life.

What makes you a unique DJ? I'm willing to do anything to make sure the party comes off right. I'm able to read an audience and know what to play and when to change things up a bit. I don't work for the tip—I put everything I have into every party.

Better than other DJs seen! He was so helpful and equally committed to a great evening as we were - we were a team from first meeting to wedding reception.
